**Can be combined!!**  
 更可合體!!

## Go! Magnum Fire Patrol

Use 3 AA batteries (not included)

Second vehicle for combined play!!

可和另一台車合體!!

**NEW**  
 2002

This product is under development. Final version may vary slightly.  
 此產品正在發展中，設計可能有所變更。

**Revolving elevator for Tomica to exit at emergency!!**  
 旋轉電梯讓緊急出發!!

**Jumbo Fire Station Fully transformable**

## Rescue Tomica 拯救系列

Original Rescue Tomica

**NEW**  
 2002

GT-R

RX-7

Ranger Car

Support Car

Let's play Magnum Patraier and Magnum Fire together!!

※Tomica minicars in this page are sold separately.

緊急発進!  
マグナムパトロール

Expósed! This is Magnum Patrailer World!!

Remote controlled! Transforms  
into Emergency Command  
Base automatically!!  
遙遠控制!可自動變成司令基地!!

DATA (trailer mode)

- Length: 40m
  - Width: 10m
  - Height: 12m
  - Gross Wt.: 750t
  - Max. speed: 320KPH
  - Carriage capacity: Max. 9 vehicles
- Can combine with  
Magnum Fire.

Form the most advanced  
patrol base by combining  
with Magnum Fire.

Trailer is ready to launch  
to required destination.

At destination, trailer  
transforms to Emergency  
Command Base. Rescue  
vehicles activate  
immediately.

Emergency Command Base  
transforms into Jumbo Trailer!!

Total length  
900mm

Magnum Rescue team  
member 拯救隊成員

Tomica emergency rescue!!  
Tomica緊急出發!!

The most powerful parking tower in Pla-rail history has arrived!! 史上最強的停車場登場了!!

**Hyper-Tomica Parking 21 超級Tomica 停車場 21**

Use 2 D batteries (not included)

**Speed and action! Your Tomica car speeds away!!**  
速度和行動！你的Tomica在奔馳!!

**Slope Slider 斜坡滑梯**

No battery required 不需使用電池

Connect to the top

**Attach extra track to allow Tomica car to run!!**  
如組合替換路軌，Tomica便可在長坡上行進!!

Connect to the middle

Point

**Independent STOP & GO dial controls Tomica action!**

# Compact 3D map series, great for combined plays!

愉快地結合的立體地圖系列，體積細小，方便攜帶與朋友一起玩！

**NEW**

## Handy 3D Map (Town)

立體手提地圖 (城市)  
Crossroads and interchanges, fun to play, and convenient to carry!

(battery changeable) 使用1個1.5小時（一般錳性電池）~ 約5個小時（鹼性電池）連續行走！（可更換電池）		

**NEW**  
2002

Now, with the advent of the new century, what do adults who truly know cars want from a minicar?  
 A faithful representation of the age, the model, the body color, the details?  
 An ability to reproduce the atmosphere of the vehicle that ran in those days?  
 Presenting this year's new limited collection, we seek to answer these questions by way of small diecast models.

## MAZDA RX-7 (FC3S/FD3S) 4 MODELS No battery required 不需使用乾電池

# トミカドリームモータースタート!!

The world's smallest motor car Tomica Dream Motor starts production in October 2001. In 31 years, the company has researched cars all over the world, and has produced 460 million mini cars!!

Many new ideas and concepts come up during automobile research. There is a strong interest in implementing these ideas, so in the 21st century.....the company decides to make the dreams come true!

The 35th Tokyo Auto Show proves to be a smashing success!!

Attendees crowded around and were thinking "Wouldn't it be nice to have a car like that!" TDM also presented its concept during the show.

Nissan Motor president has designed a popular concept car. Sometime in the future, there could be cars

running without combustion engine.

Dream car being develop as a product!!

Dream car being developed as a product!! Introduced in this catalogue, Magnum Patrailler is such a concept vehicle. As a toy, fun factor is important. As a real automobile, practicality and design are important considerations. From now on, we will produce dream cars.

## Using Plarail parts to build railway. 從Plarail組合開始造成鐵路。

### Joining Plarail tracks together 組合Plarail路軌的方法

#### Point 重點

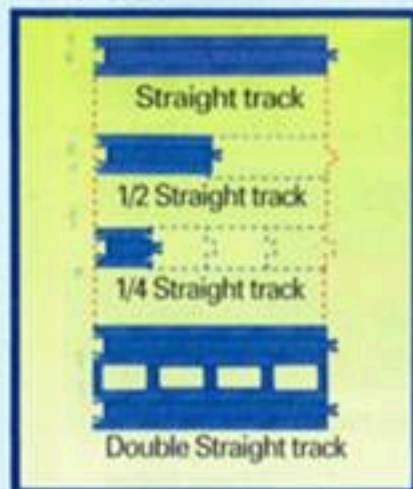

Place the indented part flat, insert the extended part into it!  
凹的部份放在下面，從上面放入凸的路軌！

Assemble the tracks together on top of the bridge foundation.  
路軌放在橋的上面裝嵌。

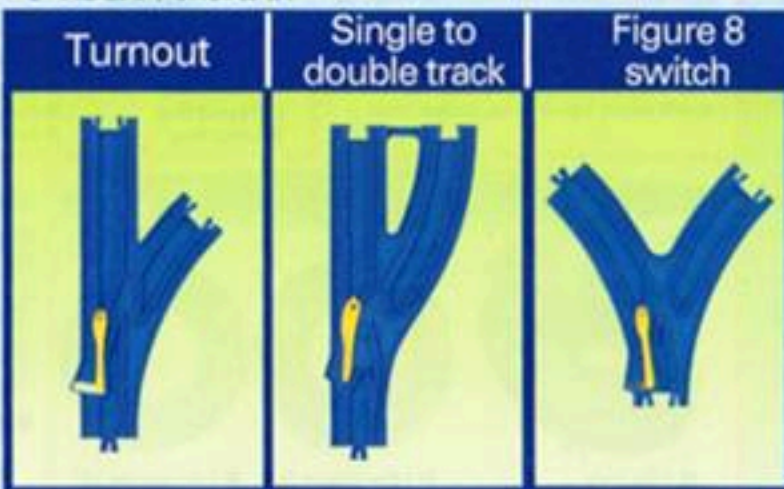

### Plarail tracks can be used on both sides

正面反背面也可使用

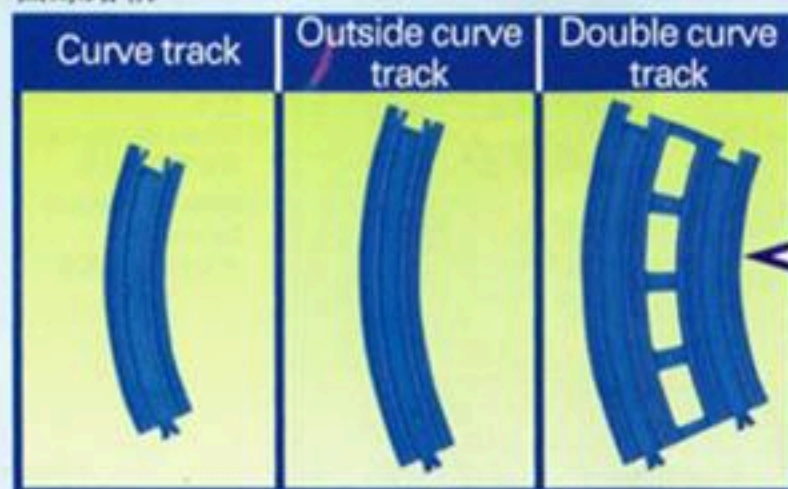

#### Straight tracks 直線路軌

#### Switching tracks 可改變方向的路軌

#### Curve tracks 曲線路軌

There are many kinds of Plarail tracks. Basic construction use straight tracks. For change of direction, use switching track or curve track.

雖然Plarail的路軌有不同的種類，但基本上是直線路軌。當想改變方向時，用軌道轉換器或曲線路軌。

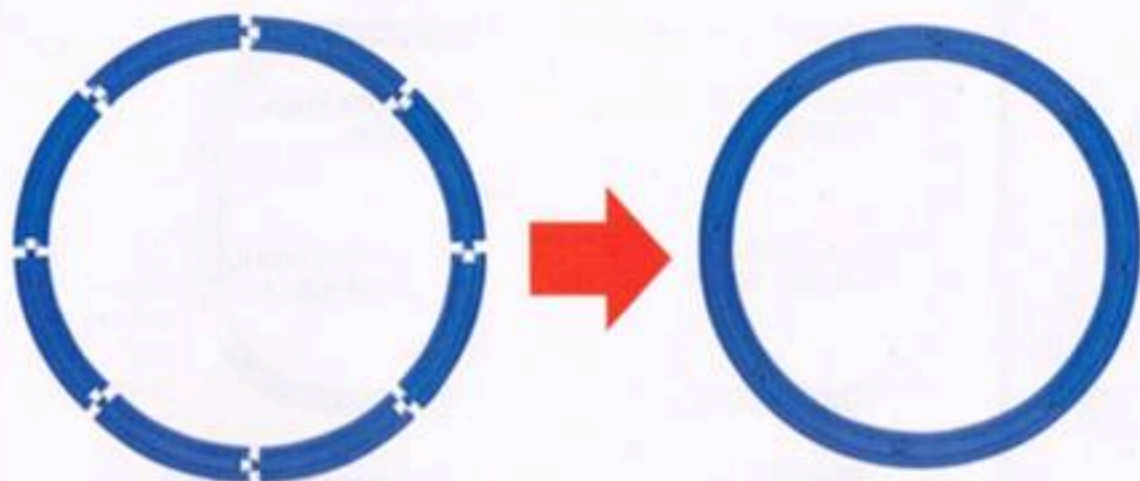

# Make the rail layout 做軌道的圖形

Basic 2

First, let's make a circle with 8 curve tracks!

首先，試用8條曲線路軌造成一個圓形！

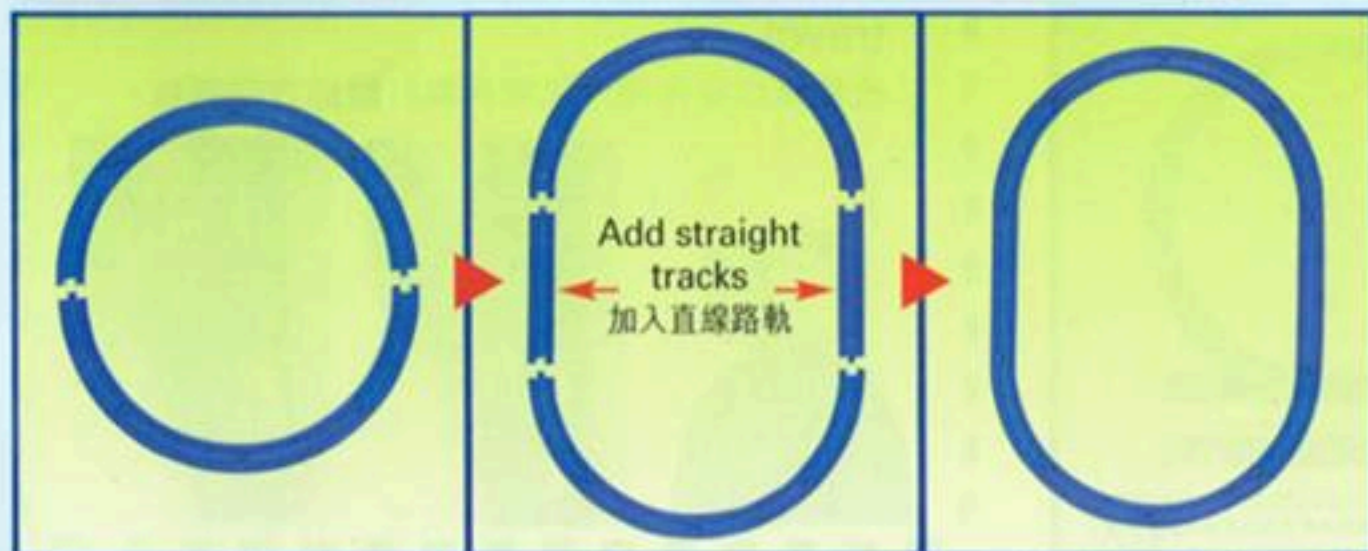

Joining 8 curve tracks together to form a complete circle.  
8 條曲線路軌連接便可造出圖形。

Join 2 curve tracks at right angles to easily enhance layout. 用2條曲線路軌作直角90度拼合，便可輕易造出圖中形狀。

Try to make an oval 試造橢圓形

By adding straight tracks, layout enlarges slightly. 加入直線路軌，版圖會一步一步擴大。

Point 重點

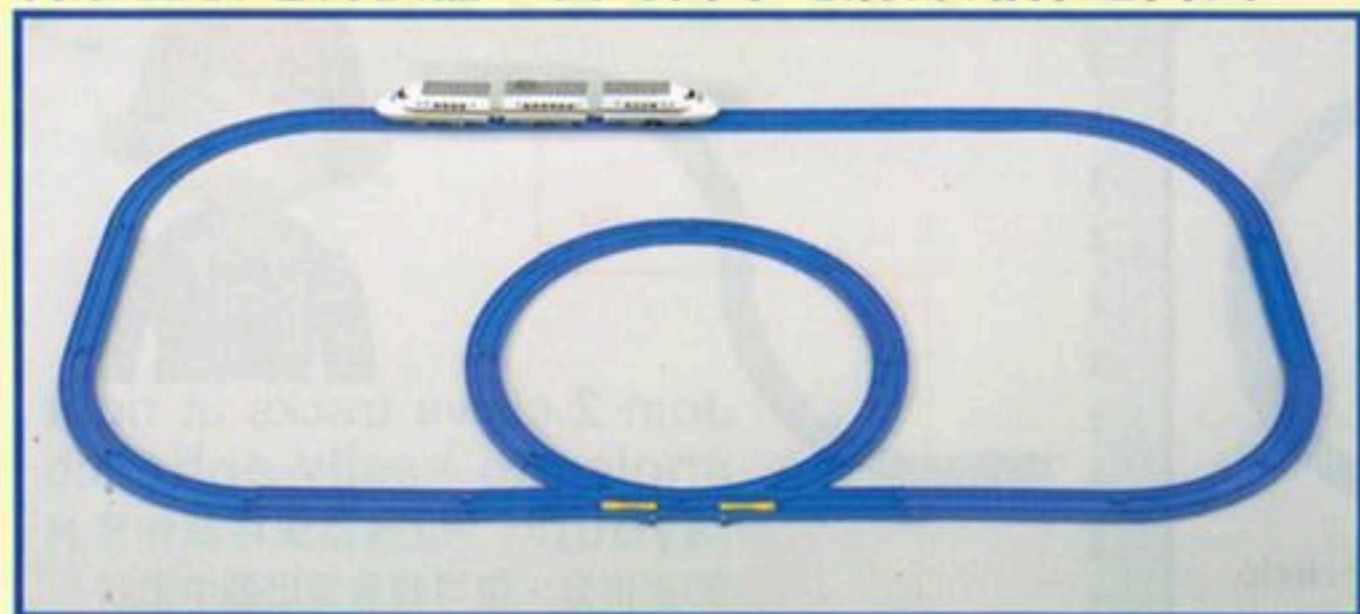

When making a larger layout, use a centre point. Symmetric tracks around the centre point will join up correctly.

Should your layout not align for completion, think of this centre point. 當版圖變大時，以其中一點為中心作對稱便能正確地連接起來。當路軌最後好像不能連接時，只要想起這原則便沒有問題了。

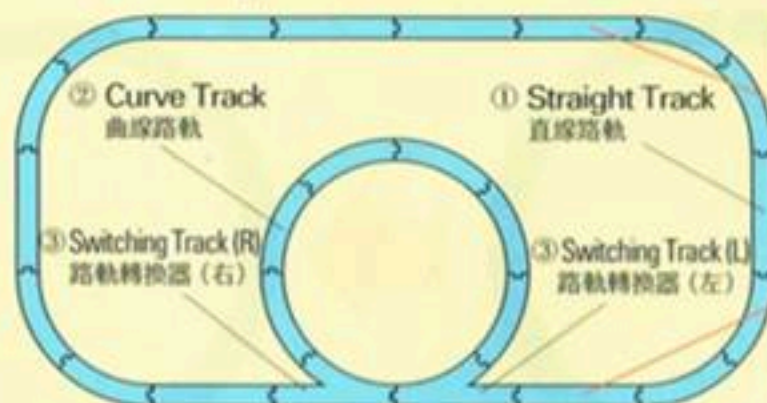

Expand the tracks by simply adding switching tracks.

若加上軌道轉換器，便可簡單地將線路伸延開去。

Layout size: 135 x 70 cm

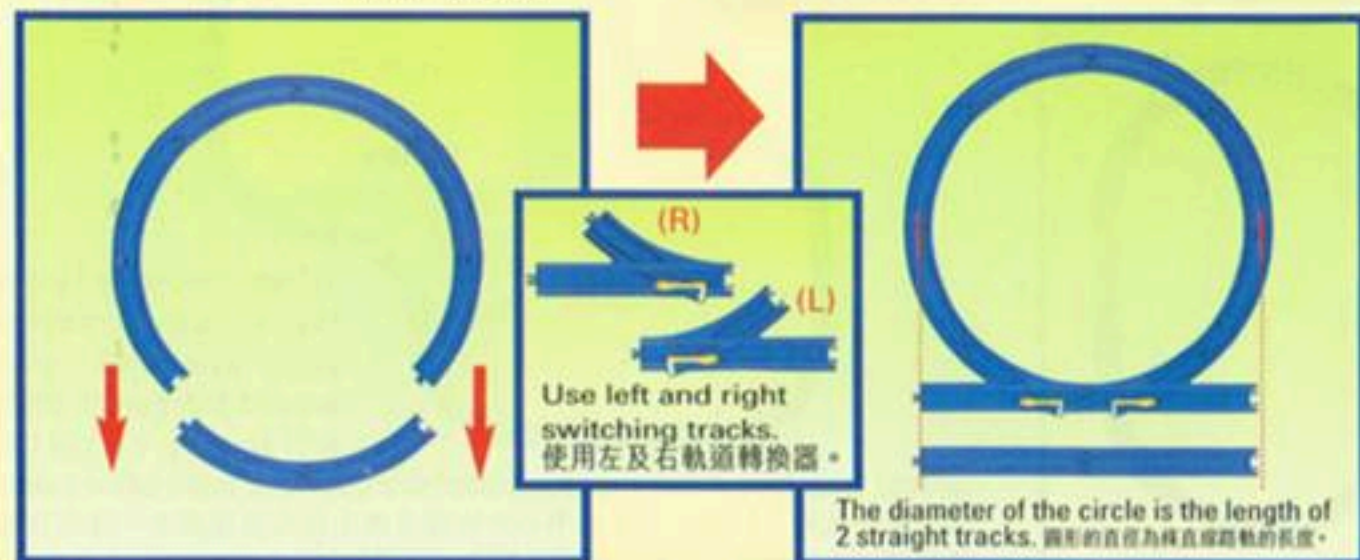

"Master 2"  
Change train  
station.  
將改為車站。

"Master 2"  
Change to  
selectable  
route. 將改為可  
選擇性的路軌。

Plarail  
① Straight Track.....8pcs  
② Curve Track.....14pcs  
③ Switching Track (L, R)...1 each

## Point 重點

Take out 2 curve tracks and replace them with switching tracks. 把圖形中的2條曲線路軌取出，代入2條軌道轉換器。

The yellow switch on the switching track changes the direction of train travel.

改動黃色操作桿便可將列車行駛的方向轉換。

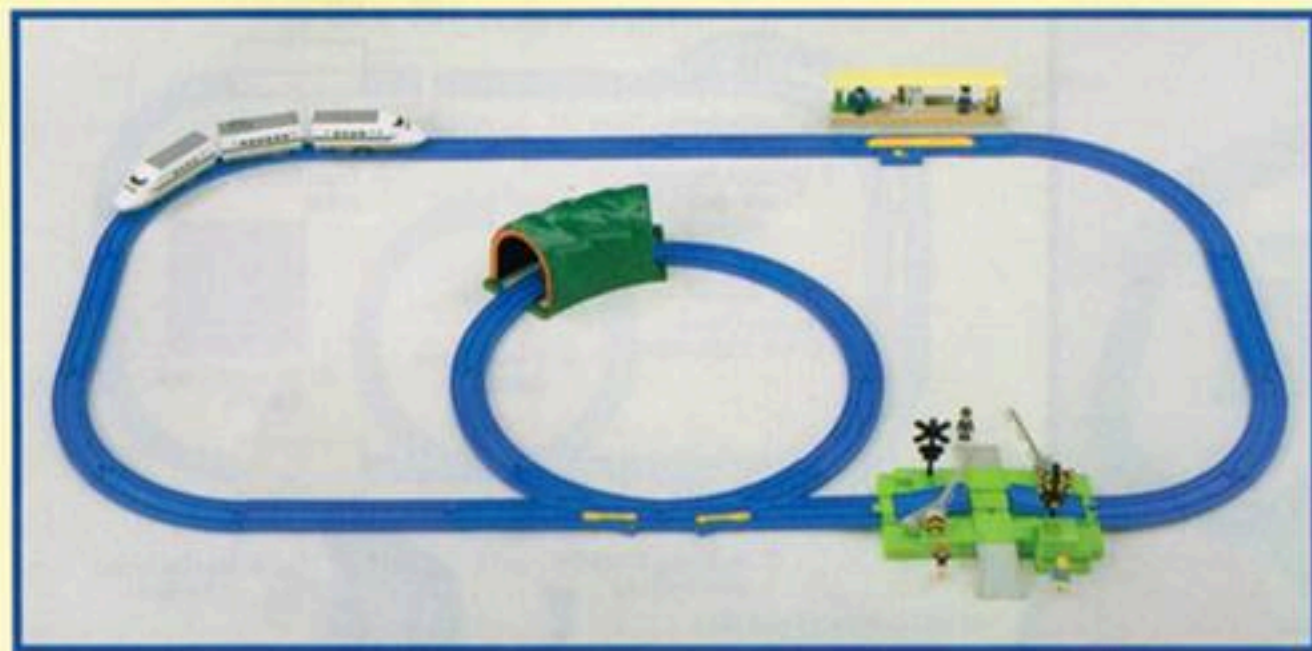

# Adding scenic accessories 加入情景配件

Master 2

## Use different scenic accessories to create memorable layouts.

可放入情景配件，使整個佈景模型更加生動吸引。

### Scenic accessories used in this layout 在這個佈景模型出現的情景配件

Put a tunnel over the curve tracks, and let different trains pass through. 在曲線路軌放下隧道，讓不同的列車通過。

The train station scenic accessory includes platform conductors. The control rod can stop the train. 車站組合內有車站服務員，面前的操縱桿可使列車停下。

Railroad crossing scenic accessory includes father, son and daughter figures. 火車情景組合包括爸爸、兒子和女兒各1個的有趣人物造型。

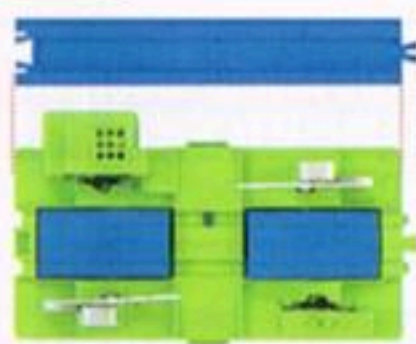

Plarail has many scenic accessories. Choose the street scenery to make your own street.  
有很多情景配件，可用來建立你的私人街道。

Different scenic parts can create different scenery.  
用不同的情景配件可造出完全不同的效果。

### Scenic accessories construction 情景配件的組合方法

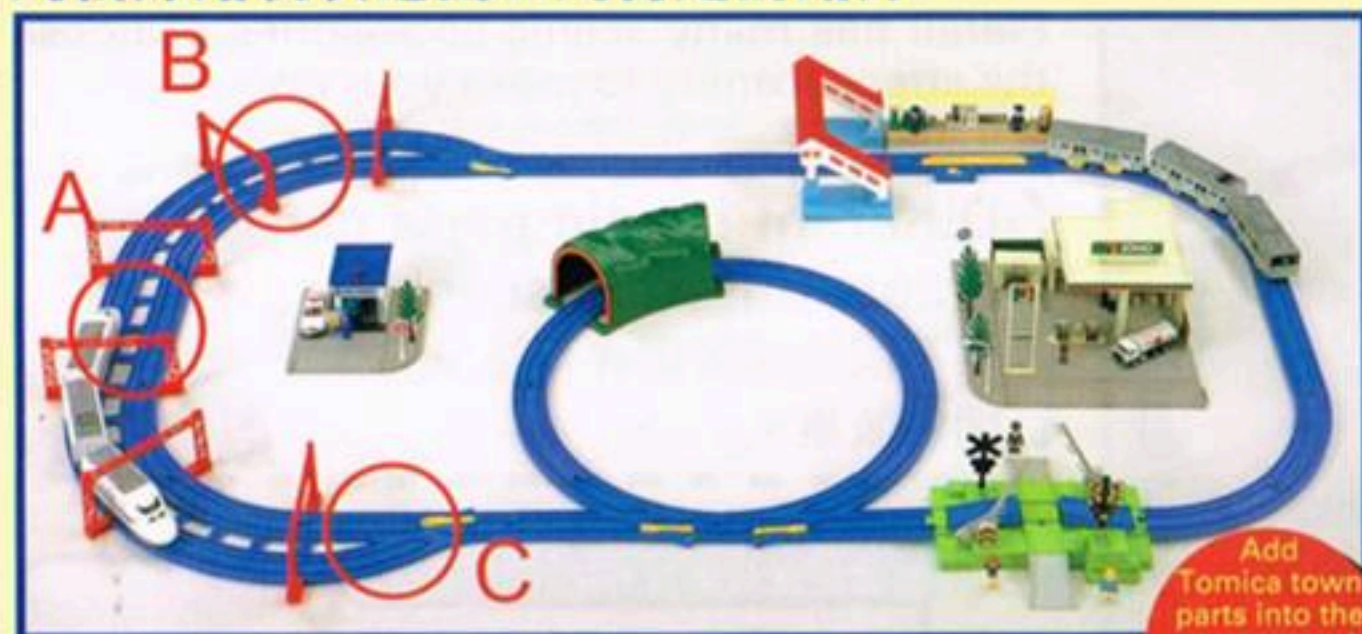

The length of 1 straight track is the same of the scenic accessory. Replace one track segment with scenic accessory. 1條直線路軌和情景配件的長度一樣，取出一條直線路軌來更換1件情景配件。

## Use double tracks to make the trains run in parallel.

用複線路軌製造出並列行走的路線。

Add Tomica town parts into the open space!  
將Tomica 城市配件放入有空位的地方!

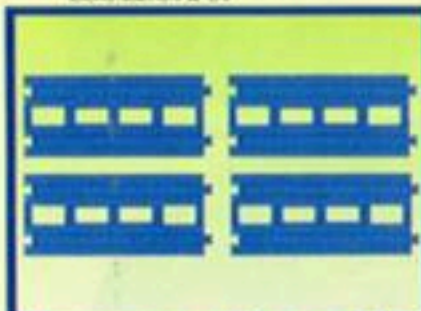

This layout incorporates double tracks.

這個佈景模型使用了複線路軌。

(A) Double Straight Tracks  
複線直線路軌

(B) Double Curve Tracks  
複線曲線路軌

(C) Single, Double Track Switch  
單線、複線路軌轉換器

Two sets of straight tracks could make a double straight track.  
兩條直線路軌可造成一條複線直線路軌。

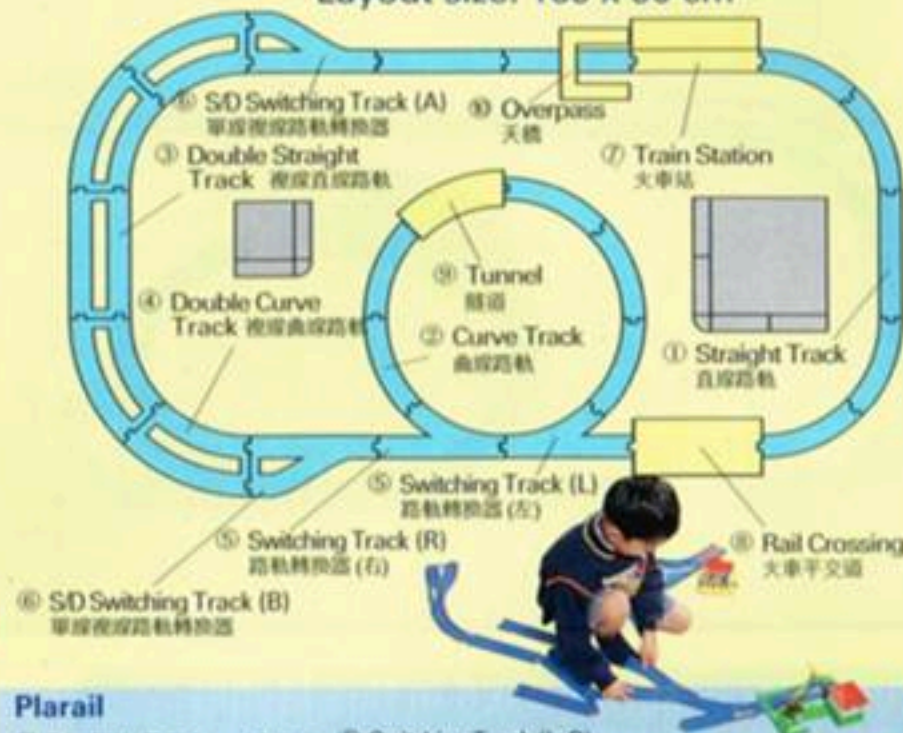

Make complex layout by combining double straight tracks together.  
和複線直線路軌組合起來，便組成更多變化的路線。

There are two kinds of single, double switching track.  
路軌由單線變為複線的時候，有A及B兩種。

Layout size: 165 x 90 cm

Plarail

- |                                 |  |                         |
|---------------------------------|--|-------------------------|
| ① Straight Track.....3pcs       | ⑤ Switching Track (L•R).....1pc each               | ⑧ Rail Crossing.....1pc |
| ② Curve Track.....10pcs         | ⑥ Single/Double Switching Track (A•B).....1pc each | ⑨ Tunnel.....1pc        |
| ③ Double Straight Track.....1pc | ⑦ Train Station.....1pc                            | ⑩ Overpass.....1pc      |
| ④ Double Curve Track.....4pcs   |  |                         |

Tomica Town

- Police Station.....1 ●Gas Station.....1

Double track allows trains to travel in the same direction together.  
Cool! 用複線路軌可令架車同時向同一方向前進，很有趣呀!

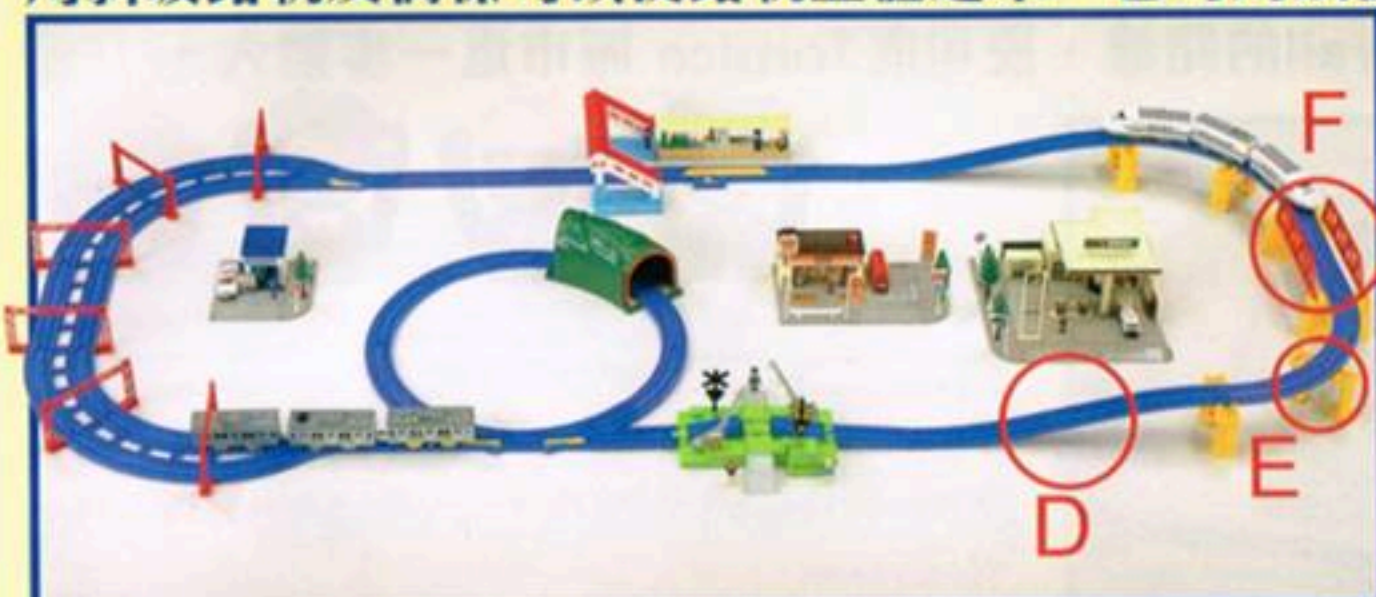

# Build another dimension to your layout 將路軌立體化

Master 4

Inclined tracks and bridges add another dimension to the layout, you can also use iron bridge.  
用斜坡路軌及橋樑可以使路軌立體起來，也可用鐵橋。

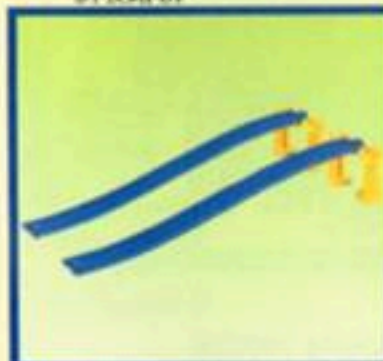

Try to let both trains run together in the double track. If it seems difficult, let one train run within the circle, and the next one could pass through it. 讓2架車同時行走，在複線路軌上順利通過。如果有困難，可讓車子在圓形路軌上行走，另一架便可通過。

This layout uses elevated parts.

這個佈景模型使用了立體化的配件。

(D) Inclined Tracks  
斜坡路軌

Easily elevate the tracks with inclined track. 1 segment of inclined track equals 2 segments of straight tracks. 利用斜坡路軌令情景變得立體化。

(E) Bridge Girder  
橋墩

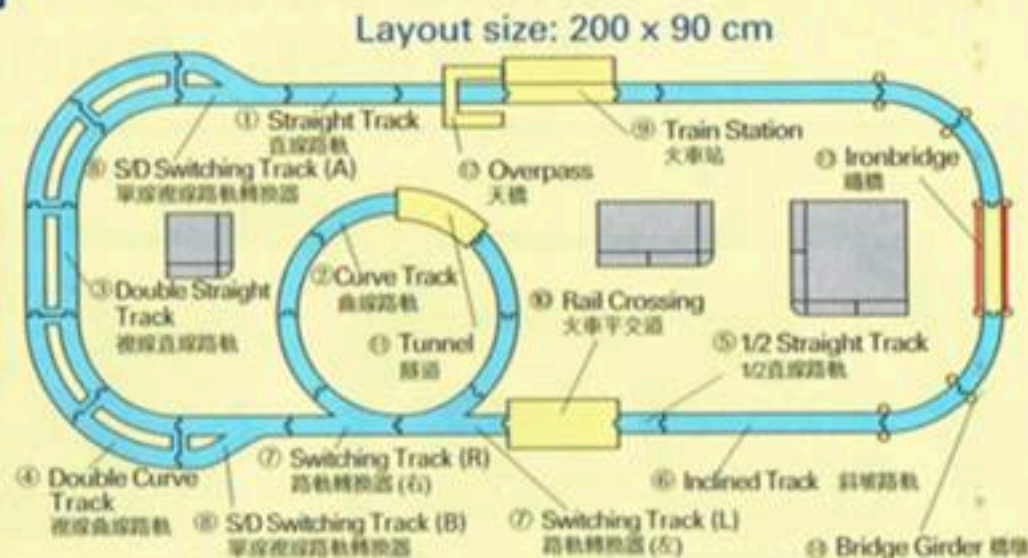

Bridge girder are essential to elevated railroad. 如果要增加立體感，必須用橋墩。

(B) Iron Bridge  
鐵橋

Add an iron bridge on an elevated track, and the scenery comes alive. 在高架線上加建橋，組合更顯立體逼真。

## Plarail

① Straight Track.....2pcs	⑥ Inclined Track.....1 set (2 pcs of tracks + 2 pcs of Bridge Girder)	⑩ Rail Crossing.....1pc
② Curve Track.....10pcs	⑦ Switching Track (L•R).....1pc each	⑪ Tunnel.....1pc
③ Double Straight Track.....1pc	⑧ Single/Double Switching Track (A•B).....1pc each	⑫ Overpass.....1pc
④ Double Curve Track.....4pcs	⑨ Train Station.....1pc	⑬ Iron Bridge.....1 set (1 pc of Straight Track + 2 pcs of Bridge Girder)
⑤ 1/2 Straight Track.....2pcs		⑭ Bridge Girder.....2pcs

## Tomica Town

●Police Station.....1 ●Fast Food Shop.....1 ●Gas Station.....1

Make good use of bridge girder!

好好利用橋墩!

Master level  
**Layout is complete**

まちづくり  
カイトブック

# Completed! Build more streets in

## For expansion, just add more Plarail tracks to allow more streets in Tomica Town.

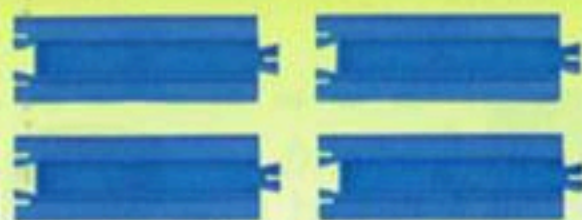

加入連接道路，伸展Plarail的路線，便可將Tomica 城市進一步擴大。

**Point 重點**

Use 1/2 and 1/4 length straight tracks to adjust fitness.

用1/2 和 1/4 長的直線路軌來調節長度。

Only one size of 1/2 is available for length adjustment only.

1/2的直線路軌只有一種，做大型的鐵路時用來調節長度。

1/4 length tracks has different connectors, they can be used to connect tracks in different directions. 1/4直線路軌用作連接路軌於不同方向和調節長度。有三種類型可供選擇。

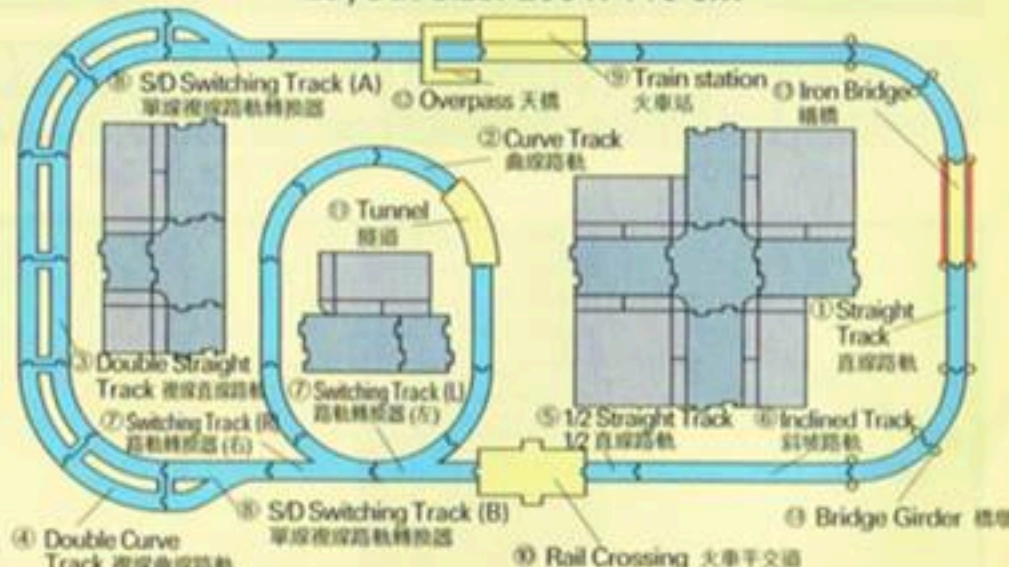

### Plarail

- |                                  |  |  |
|----------------------------------|--|--|
| ① Straight Track.....5pcs        | ⑥ Inclined Track.....1 set<br>(2 pcs of Tracks + 2 pcs of Bridge Girder) | ⑩ Rail Crossing.....1pc  |
| ② Curve Track.....10pcs          | ⑦ Switching Track (L+R).....1pc each                                     | ⑪ Tunnel.....1pc   |
| ③ Double Straight Track.....2pcs | ⑧ Single/Double Switching Track (A+B).....1pc each                       | ⑫ Overpass.....1pc   |

| ● Police Station.....1 | ● Car Park.....1    | ● Road Crossing.....1  |
| ● Convenience Store②.1 | ● Gas Station.....1 |                        |

Layout size: 200 x 110 cm

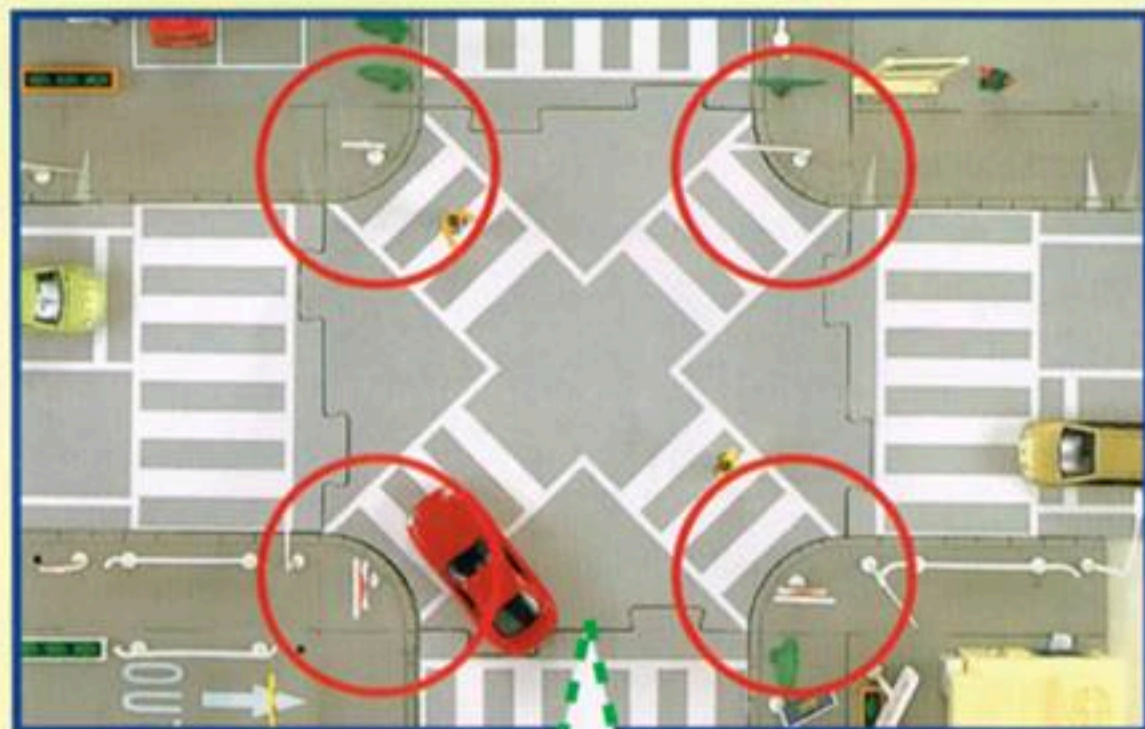

# Tomica Town! 完成了! 在Tomica 城市製造更多街道吧!

Master 5

In Tomica Town, you can control the Tomica cars to drive on the streets. 在Tomica 城市內，只有你可控制車輛在街上行走。

Try road crossing. 試用連接的道路

The round corner of Tomica Town part connects to the round corner of road crossing part.  
Tomica 城市的角落圓形部份與連接道路交匯處的圓形部份應該是完全配合的。

**Point 重點**

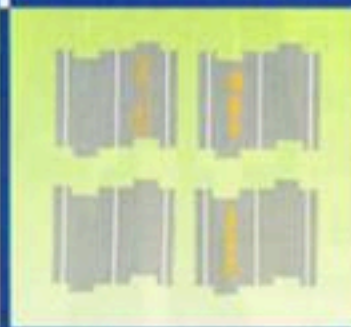

Various kinds of connecting roads

連接的道路  
有不同種類

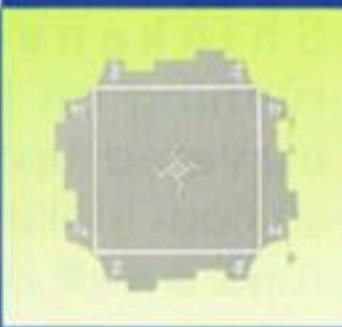

3 kinds of large road piece with pedestrian crossing. Use at crossing or road junction. 大的直線道路有3種，在行人橫過道路的位置或交匯處使用。

4 kinds of small road piece, at half the length of large road piece. Use according to the size of Tomica town. 小的道路有4種，是大的道路的一半。應配合Tomica 城市的大小使用。

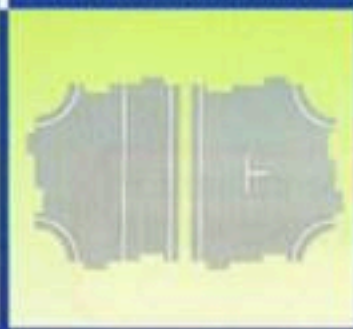

2 kinds of large road piece, figure shows auto crossing. 十字路有2種，圖中的為汽車專用的款式。

Another kind of road crossing, being used in metropolitan area. 十字路的另一款式，在大城市中的交匯處內使用。

T road crossing. It is the same length as straight road piece, convenient to connect. T字路口有2款，長度與直線道路相同，所以很容易組合。

**Familiar with the basics,  
move on to new challenges!**  
掌握了基本，嘗試挑戰更高層次!

## Let Bullet train run on elevated

This layout uses the station building to join two decks of tracks. Shinkansen runs on the elevated level, separated from the tracks below, to make sure there is no chance of collision. Add an iron bridge for a more powerful presentation.

這個模型是在車站大樓內上下加入2條路軌的圖則。新幹線在高架路軌上行走，與下面的路軌沒有連接，因此不用擔心會有相撞。加上了鐵橋後令整個鐵路組合更壯觀。

Tomica Town, with  
Plarail running on  
the street level.  
Shinkansen  
running on the  
elevated level,  
so cool looking!

Tomica 城市內配上Plarail  
鐵路在街道上行駛，新幹  
線在高架路軌上行走，很有趣啊!

Place your favourite streets in  
Tomica Town. 將你喜歡的熱鬧街道放  
在Tomica 城市內吧。

Many trains could enter and exit the station building. Make a large station by putting several station buildings together. 將幾個車站大樓連接成一個更大的火車站。

Large iron bridge is twice as long as a straight track, with bridge girder included. 新大鐵橋是直線路軌長度的2倍，有橋墩可方便利用。

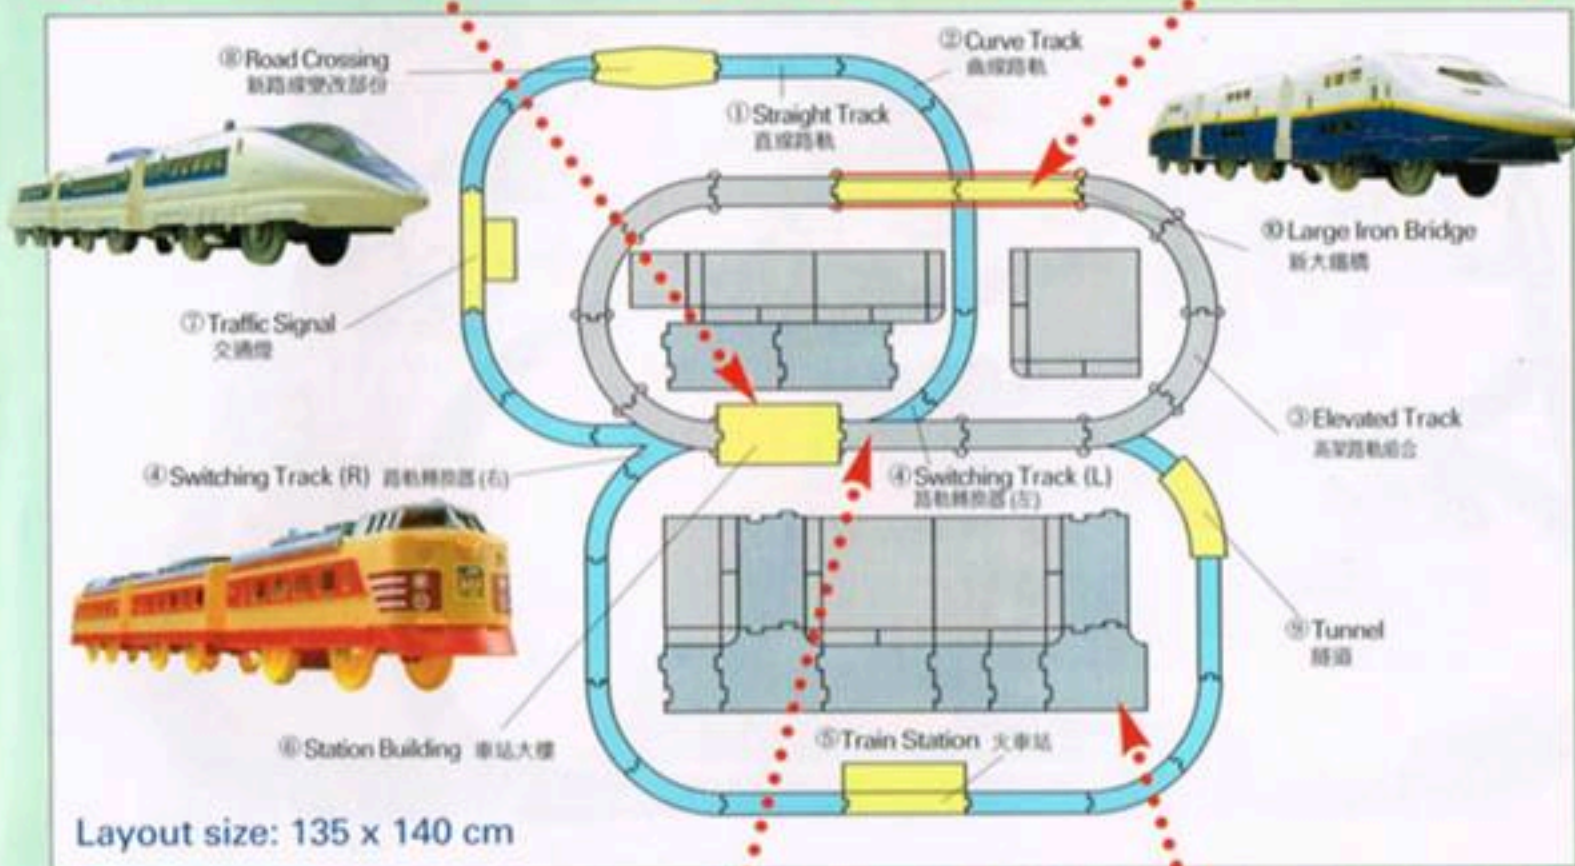

### Plarail

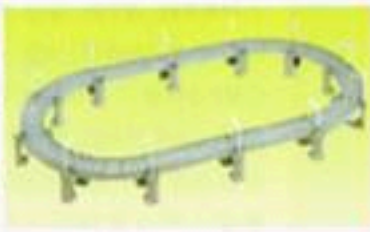

① Straight Track	7pcs	⑥ Station Building	1pc
② Curve Track	14pcs	⑦ Traffic Signal	1pc
③ Elevated Track	1pc	⑧ Road Crossing	1pc
④ Switching Track (L•R)	1pc each	⑨ Tunnel	1pc
⑤ Train Station	1pc	⑩ Large Iron Bridge	1 set
			(2 pcs of Straight Tracks + 2 pcs of Bridge Girder)

### Tomica Town

● Car Wash	1	● Convenience Store①	1
● Fast Food Shop①	1	● Restaurant	1
● Police Station	1	● Fast Food Shop②	1
● Car Park	1	● Connecting Roads	1

Shinkansen running on elevated tracks can connect to Plarail. There are also many alternative layouts. 新幹線在高架路軌組合上行走，當然可以和藍色路軌連接，能造出很多不同的鐵路組合。

Build streets in front of the train station. Add Tomica Town and connecting roads to make a shopping street. 在車站前建立街道，只須放下Tomica 城市配件及連接的道路便可形成商店街。

**Familiar with the basics,  
move on to new challenges!**

**掌握了基本，嘗試挑戰更高層次！**

Use new switching  
track and stop rail  
to build a big  
garage.

利用新的線路轉換及停  
車處可試試造一個大型  
車庫。

# Grand transportation collection!! 活動交通大匯合!!

This design allows cargo trains to select the route to go. Choose the outer track to go through the iron bridge, or the inner track to the train wash. The large garage can hold many trains. Trains such as EH500 or EF210 are very suitable to that.

離開車庫的貨物列車，選擇行駛方向。外面的路軌可通去鐵橋，裡面的路可通去洗車站。此大型的車庫可容納很多貨車，之前介紹過的EH500金太郎或EF210桃太郎也很適合喔！

Try a new switching track and you  
can split the rail in three directions  
within a very small space, very  
convenient to use in a garage.

使用新的線路轉換，只需很小的空間，路軌  
可分為3個方向，用在大型車庫上十分方便。

There are so many  
trains waiting in the  
garage. Which one  
should move first?

有很多架火車還在車庫等候，究  
竟那一架火車應該先開動呢？

# Let's go cargo trains!

## 貨物列車開行吧!

### Challenge 2

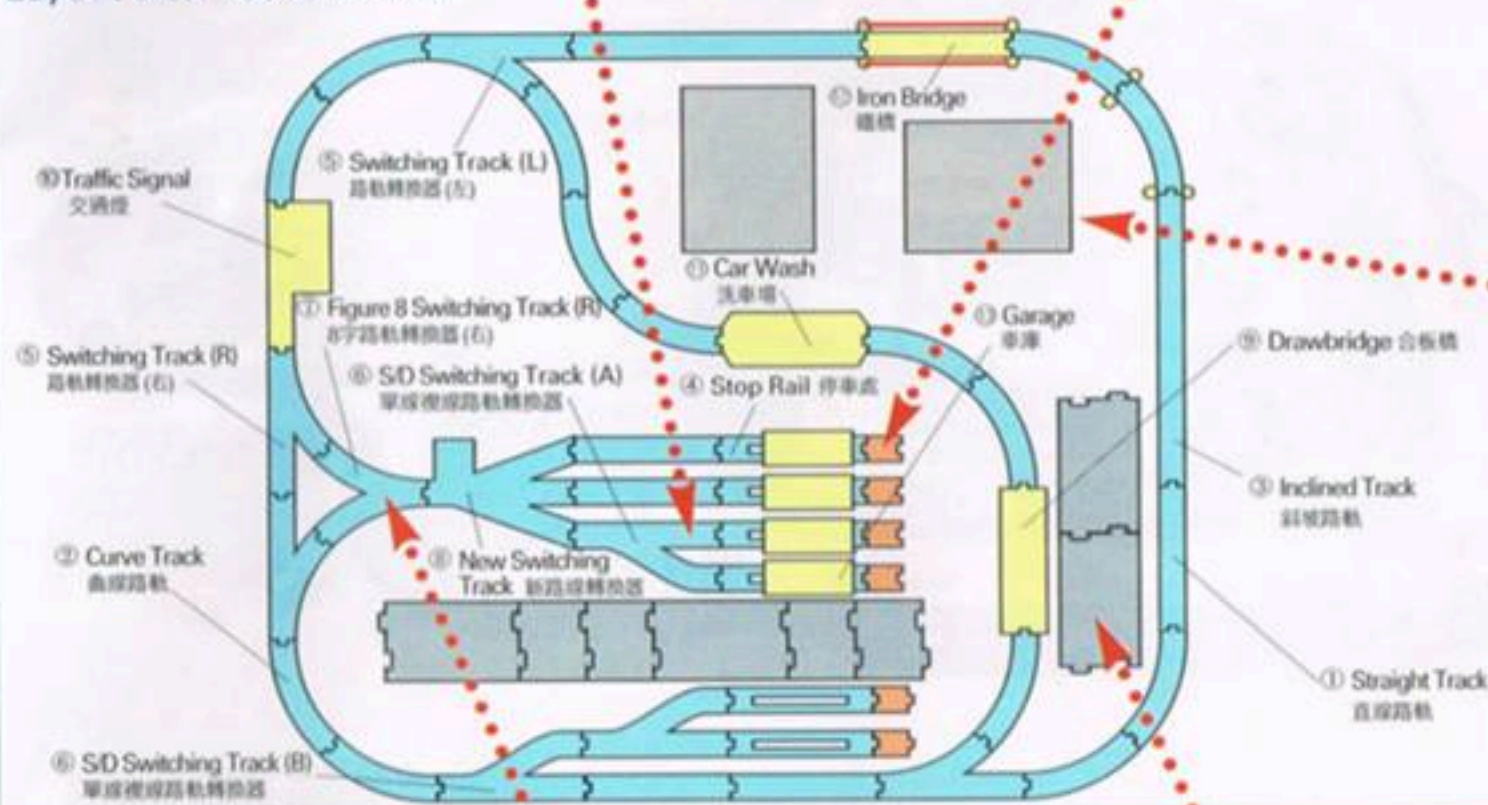

Expand the garage easily with single/double switching track.  
用單線複線路軌轉換器可擴大車庫。

Stop rail uses a control rod to make trains go or stop.  
停車處利用操縱桿，能夠控制列車停止或前進。

Layout size: 135 x 115 cm

Loop Point Rail with curve tracks, can be used to make left and right turning tracks.  
用8字型路軌轉換器，再加上曲線路軌一組，便可將路線分向左右兩邊。有左及右兩款。

You can place construction vehicles on the connecting roads and expand the roads later.  
連接道路上可放置工程車輛，慢慢可伸延道路。

#### Plarail

- |   |   |
|---|---|
